

GM® 6.2L/6.5L DIESEL ENGINE

Overview

The 6.5L turbo, 6.2L repower and 6.5L naturally aspirated engines are configured for most General Motors, C/K, commercial and military applications. DSG's remanufactured 6.5L is the professional's choice for low cost, high quality replacement engines. The complete Drop-In configuration is available in both mechanical and electronic versions.

DSG also offers the 6.2L repower configuration, a 6.5L long block paired with a 6.2L fuel system for improved performance.

Engine Applications

- Small School bus
- Walk-in Van
- Pick-up Trucks
- Delivery Van

Configurations

- General Motors 6.2L Repower
- General Motors 6.5L Naturally Aspirated
- General Motors 6.5L Turbo

Engine Upgrade

The GM 6.5L engine now features a NEW block, camshaft, and cylinder heads. In addition the Complete Drop-In turbocharged engines for years 1996-2001 will feature a NEW Electronic Injection Pump (*Where applicable*).

Engine Identification

It is common to find vehicles that have had a 6.5L engine substituted for a 6.2L engine. The difference in fuel filter assemblies can be used to positively determine whether an engine is a 6.2L or 6.5L in a P-chassis vehicle. (See illustration)

Illustration shows 6.5L filter assembly for P-Chassis Vehicles. The 6.2L filter assembly is a different square-like shape.

GM 6.5L Turbo

Long Block Supreme Includes
